

Omar Ahmed Helmy Elwahy

CyberSecurity Engineer

Oelwahy@gmail.com | +20 1021165550 | El-Rehab City, Cairo, Egypt | Github | LinkedIn

PROFILE

Cybersecurity student at Cairo University (Class of 2027) seeking a penetration testing internship. Trained by ITI and DEPI with solid skills in networking (Cisco/Huawei) and web security. Ready to help a security team find vulnerabilities and secure systems.

EDUCATION

Bachelor of Computer Science, Networks, and Cybersecurity, *International Branch of Cairo University* 06/2027

High School, *Spatiss Modern Academy* 07/2023

CERTIFICATIONS

CCNA: Switching, Routing, and Wireless Essentials, *Cisco* 06/2026

- VLANs & Inter-VLAN Routing: Segmenting broadcast domains and routing traffic between them.
- Redundancy Protocols: Preventing network loops using Spanning Tree Protocol (STP) and aggregating links with EtherChannel.
- Available Services: Managing dynamic IP allocation via DHCP and redundancy with FHRP (like HSRP).
- Wireless LANs (WLANs): Implementing and configuring Wireless LAN Controllers (WLCs) and basic wireless security.
- LAN Security: Mitigating structural threats using port security, DHCP snooping, and ARP inspection.

CCNA: Introduction to Networks, *Cisco* 01/2026

- Network Fundamentals: Basic components, topologies, and types of networks (LAN/WAN).
- OSI and TCP/IP Models: Data encapsulation, protocol operation, and physical/logical addressing.
- IP Addressing: IPv4 and IPv6 subnetting, configuration, and address types.
- **Basic Device Configuration**: Securing and setting up Cisco switches and routers.

HCIP-Security, *Huawei* 08/2025

- Advanced enterprise defense, including DDoS mitigation, IPS, and cloud security.
- Complex firewall deployments, high availability, and IPSec/SSL VPNs.

HCIA-Security, *Huawei* 07/2025

- Foundational network security, basic cryptography, and OS hardening.
- Huawei firewall configuration, NAT, and basic security policy deployment.

Jr Penetration Tester, *TryHackMe* 05/2024

- Foundations & Recon: Covers pentesting methodologies, the Cyber Kill Chain, and in-depth host discovery using Nmap.
- Web Application Security: Hands-on exploitation covering OWASP Top 10 vulnerabilities like SQLi, XSS, CSRF, and API testing using Burp Suite.
- Active Directory (AD): A dedicated 9-room module teaching NTLM relay, Kerberos attacks, lateral movement, and credential harvesting.
- Exploitation & Scale: Teaches password cracking (Hydra/Hashcat), Metasploit Framework usage, and Linux/Windows privilege escalation.
- Reporting & Capstones: Concludes with full kill-chain environment challenges and technical report-writing principles.

TRAININGS

ZINAD - Cybersecurity Training 07/2025

- Completed intensive training at ZINAD covering red teaming operations, penetration testing, bug bounty hunting, and application security (DAST, SAST, code review).
- Developed practical skills in vulnerability assessment, exploit development, threat modeling, and delivering security awareness practices.

Penetration Testing & Vulnerability Assessment, *DEPI* 07/2026 – Present

Junior Penetration Tester | Ethical Hacker, *ITI* 08/2026 – Present

PROJECTS

Ride Sharing Database and App

- Developed a ride-sharing desktop application using C# (Windows Forms) and SQL.
- Designed the database schema to manage user profiles, ride history, and transaction data.

Network Traffic Analysis using Wireshark

- Captured and analyzed packet flows using Wireshark to identify security threats and performance bottlenecks.
- Simulated network attacks in a lab environment to practice protocol analysis and defense.

Encryption Algorithm Implementation

- Implemented custom Java versions of DES, LFSR, AES, and RSA encryption algorithms, and Implemented Diffie-Hellman and Elgamal key exchange algorithms.
- Executed bitwise operations and key generation to demonstrate deep understanding of symmetric and asymmetric cryptography.

SKILLS

- **Ethical Hacking**: Web App Pentesting, Network Penetration, Vulnerability Assessment, OSINT, Privilege Escalation.
- **Networking**: TCP/IP, OSI Model, IP Planning, Subnetting, Huawei & Cisco Firewall Technologies
- **Offensive Tools**: Burp Suite, Metasploit, Nmap, Wireshark, Kali Linux, Nessus, BloodHound.
- **Programming Languages**: Python, C++, C#, Java, PowerShell, SQL, Assembly, Verilog
- **Soft Skills**: Problem Solving, Teamwork, Fast Learner, Adaptability, Time Management
- **Languages**: Arabic (Native), English (Fluent)
